

CADMO Infor – Company Profile

CADMO Infor provides computer services since 1990 and on-line and on-site support for information systems and networking services since 1995. Combining the knowledge and the skills in these fields, nowadays CADMO is the leader in the "Social Informatics", a set of procedures, platforms and data flows that operate together in order to support and help the managers and the operators of social services to accomplish every day tasks and take strategic decisions.

The company sponsors new projects and the research in order to improve its products (PSAFA, "Internet of Things") and to create, in an interactive way, the cultural background of the citizens (SocialWiki).

The services provided by CADMO Infor rely on a personalized E-learning Open Source platform, on a Web Application Scheduler for workgroups and on a Web CMS platform for documents management and IT resources management, for the management the inventory and of the organization chart and for the individuation of the critical issues of the information system. For all CADMO Infor products are possible customizations and integrations with other applications in order to improve the management control and to share information among workgroups.

Furthermore, CADMO Infor provides training to operators and advice to keep the customers updated and able to carry out their activities.

Today the company, with its main product SIS "Social Information System", allows about 700 social health operators to give assistance to the 38% of the population of Piedmont, distributed in the province of Turin, Cuneo, Biella, Vercelli and Alessandria, overcoming all the assistance problematics in urban and in mountain and countryside areas.
